This game has far too many mechanics designed to frustrate and annoy you. From breaking your items to robbing you blind, it leaves you feeling more angry and frustrated than satisfied after a gaming session with friends.. sorry idk what to do. Twin Blue Moons was quite a pleasant surprise! I picked it up because it was inexpensive, looked cute, and didn't have a lot of reviews yet, but it gave me a lot more than I expected. There is more to the story than there seems at first glance, with the full narrative taking all the play-throughs to be revealed. Nor does the game hold your hand: there are lots of hints and clues about the deeper narrative, but the game leaves it up to you to make the connections on your own.

I didn't particularly care for the art style at first, but as I got used to it I realized it works really well for the fantasy setting, especially the backgrounds and the detail.

It seems like there is even more to this story than what we get in this game, and I for one would love to see more.. Game looks great and seems to play great. Had a small problem when setting my resolution higher, had to quit game and come back in.

Overall the net hacking is pretty amazing. Feels like you are doing Shadowrun decking in first person. The tutorials are only pages to read, so that isn't as good as the game teaching how to play. Game doesn't look like it will be that easy either.

Hacking comes down to running across the grids, trying to find the proper nodes to access and defeating ICE in multiple ways without getting knocked out yourself. So far no flaws in game besides the beginning part I talked about.

Would recommend to fans of Hacking games, Shadowrun, the simple roguelike Decker, and especially the Old Genesis Shadowrun.. This is the only erotic VR game I would play even if there wasn't any nudity. But there is! (A bit hard to unlock). Unlocking the mixed bathing also makes the play area twice as big, so I suggest to aim for this one asap.

Technically this is very well made and there are quite a lot of different weapons. I prefer anything long enough to kill the monsters from the distance and the gun of course.

The bath is just beautiful, the femals models are quite nice.

Highly recommended!. 10 chapas, media hora para el perfect y una guarrada \u00e9pica de comienzo a fin. No puedo pedir mas nada.. Came for the "PLOT" (\u0361\u00b0 \u035c\u0296 \u0361\u00b0) stayed for Plot.. The game's pace of the AI is a real problem.

Any development on future content \u2713 updates are abandoned.

Overall found the game lacking in fulfilment.. I just purchased Horizons and I cant play it on steam. This is seriously \u2665\u2665\u2665\u2665ing annoying. Poker superstars II does not work. No communcation from steam. Steam is very hard to reach. Will not buy anymore games from them.

Defend your life is a tower defense game which was inspired by Kingdom Rush.

Pros

- Unique setting. It's not just a usual fantasy setting which is typical for TD games. You defend the human body from different viruses and bacteria. There aren't many games in this setting, and this game is definitely the first one of this kind in TD genre.
- Although the game is a clone of Kingdom Rush, it has some new features. Magic tower has been replaced with a support tower. Each base tower can be upgraded into 2 different ones on level 1. Total number of towers is slightly higher than in KR. There are 3 skills instead of two.
- Game is simple to play
- There are game speed settings

Cons

- [Although I found "Human Body" setting interesting, can anyone explain me what does Rocket Launcher do in my stomach? Why do bacteria wear iron helmets? I would advise to use antibiotics and vitamins instead of cannon towers. It would perfectly fit. The game looks like a lazily-done concept. My final impression about this story and setting is totally negative.](#)
- [This game was designed as free-to-play game for mobiles. There are consumable items which highly improve your defenses. Devs from KR cut these things when they ported the game to PC. But Alda Games decided to not waste their time and forced players to start the previous levels again and again to get "gems".](#)
- [Waves of each mission are short and always the same. It's pretty interesting to watch them during the first 2-3 missions. When you find out that the next levels have almost the same types of waves, you get bored.](#)

[The game is not bad. I think newcomers to TD genre would find "Defend your life" attractive. For these people I say wait for 60% discount and try it.](#)

[But I can't recommend this game for people like me who like to play innovative and interesting games enjoying every minute of the game.. So, in order to play, you have to go through the title screen which is watching 6 trees grow out of the ground, 1 at a time and some rabbit moving around. Then you have the title of the game displayed for 5 seconds.](#)

[If you think that's not important, just wait.](#)

[I went through a few scenarios: "Click these carrots and make them grow" "click these eggs to make them grow" etc. Takes about 5 minutes each, but in between, you have to wait for the title screen to do its thing each time.](#)

[The third scenario was this wierd "whack a mole" game that seemed really out of place. It was at night, in water and I was clicking on moles. Okaaayyy](#)

[Maddened by the fact that I was playing more "title screen" and loading screens then the game, I tried sandbox mode in the hopes I could get more out of it. Fish and butterflies I think.](#)

[At least, that's what ended up on my island. Fish, bugs, butterflies, and not much else.](#)

[If you delete trees, that's it, no getting them back.](#)

[I tried going back to the scenarios to see if I missed a tutorial or something on how to get different things on my island. I had managed to pick up a carrot and placed it on my island in sandbox mode, maybe the same could be done for trees?](#)

[Maybe I needed to scare away fish for rabbits to come?](#)

[But the game slowed to a crawl when I tried to play the next scenario, spanting trees with squirrels.](#)

[So, a memory leak, slow, slow load times and not much to do until the game says you can. Nice idea, not so great execution. There are better time wasters out there.. I bought & slated this game in an earlier review. The game synopsis & advert has changed since then, and the devs have continued to work on it. I'm really interested in procedural & open gameplay projects, and retract my earlier harsh words about this project. The current, honest appraisal of the game on the Steam Store page is a fair indicator of the type of deal you're buying into, an ongoing development with a lot of potential for those who like this sort of thing. Keep on keeping on guys \(and/or girls \), sorry for my earlier scathing appraisal, it was unwarranted. \(Comparison to "Deadly Profits" no longer warranted \).. not real.what inglorious basterds is to WW2-this is to basseball.. Couldn't ask for more](#)

from a puzzle game. Hard but fair, well-presented, an interesting style of puzzle, and generally addictive as hell. Stayed the course to finish the main set of 96 puzzles; looked at some of the bonus basement puzzles but the variants they throw in were a bit too much for me. Still, quite a triumph by the designers.. dont spend any money on this!. Makes me sad, happy and confused. It was a good read.. **THERE IS NO MULTIPLAYER!** The "multiplayer" is you playing against bots and trying to get a higher score than a different human playing against their own bots. **THERE IS NO PLAYER VERSUS PLAYER IN THIS GAME.** Im capitalizing and repeating that to emphasize the point because games description says "multiplayer". Don't bother. This game is a straight port from a cell phone game. There is zero depth or purpose and the game is setup for micro transactions and to advertise with spam. **THERE IS NO MULTIPLAYER.** You dont even have hands in the game. Just your gun mapped to where your controller is. The reload is just some automatic junky animation. There is literally no reason for anyone to buy this game. If you like paintball, either go play real paintball or play a game like rec room. If you like first person shooters, you could play ANY OTHER first person shooter and have a better experience. When I say that they just ported a game from a cell phone to VR, I mean it. There is NOTHING here. I love paintball. I was looking forward to this game when I first saw it. It sucks.. What a well executed throwback to fun games. A great game that brings back all the best things about 8-bit gaming. Before things like loot boxes, dlc and season passes. Good gameplay and some creative ideas done well. Would easily recommend to anyone who's s fan of casual games. Good stuff.. The game is simple and short, but this is are not issues, the game is planned that way. A good old school and cheap game.
