About This Content

New adventures await your Sims on the sunny shores and beneath the glistening water of an island paradise! From exploring the tropical isles to creating a five-star resort experience, your Sims can decide to embark on an unforgettable journey or make themselves a new home in this new utopia. Nautical Sims can even take the helm of fully customizable houseboats and set sail between islands! If your Sims would rather be in the water than on it, they can snorkel and scuba dive their way through the ocean. Who knows, they might uncover sunken treasure or befriend a mermaid! With innovative features never before seen in The Sims PC franchise and a world of new possibilities on land and in sea, your Sims will reap the benefits of their own island paradise.

KEY FEATURES

- Set sail for adventure. Be it by paddleboat or speedboat, your Sims can now leave port to discover new lands and explore like never before, from inter-island travel to discovering their own uncharted island. Landlubbers need not apply!
- Build and run a five-star resort. Create a family-friendly resort of waterslides and buffet tables, a romantic retreat dotted with minimalist cottages, or a singles resort featuring multiple pool bars where Sims can mingle and flirt. Choose and fine-tune your amenities, set your prices, and wait for the reviews—and Simoleons—to pour in. The higher your star rating, the more popular your resort will be!
- Life is a beach. See what surprises await under the sea as your Sims build their skills in snorkeling/scuba diving. Your Sims may find themselves on the shore of a new island or discover sunken or buried treasure.

-
- Boat sweet boat. Whether your Sims love the water or are just prone to wanderlust, a houseboat may be the perfect abode. Houseboats are fully customizable and can be moored at any open port, so if your Sims tire of the view, relocate to a new locale!
 - New ways to build. New stilted foundations give your Sims the best of both worlds—a home that's partially on the water and partially on land. Build a resort, create travelling houseboats, and customize your very own island paradise for your Sims!

Title: The Sims 3: Island Paradise

Genre: Simulation

Developer:

The Sims Studio

Publisher:

Electronic Arts

Release Date: 25 Jun, 2013

a09c17d780

It worked when I had fewer expansions, now within 5 minutes (on isla paradiso), if you go on 5 speed, it freezes... Would however recommend for the things it offers for all maps (just don't have too many expansions).

Not worth it for me.. This would be the best map, if it didn't lag to the point of being unplayable. Don't tell me to upgrade my computer either. It's better than yours. The optimization wasn't thoroughly tested (or it was and EA was like GFO we just want your money.) I powered through long enough to get some skills and baubles from diving. Wasn't worth it.. This is my favorite expansion, it has lots of cool stuff to do like diving, working as a diver. you can be friends with mermaids build house boats...glitches are far and few between for me. the views are amazing! it has the best clothes, and hair styles also. in my opinion worth the buy.. Not worth buying it kills all computers with mass lag i know from my own experience so don't waste your money on this shame of an expansion. without the lag it is great but due to the sheer amount of lag it is rubbish
